Franchise programme of University of the West of England, UK

Course overview

Both the development of information technology and the Internet have led to innovation and growth, but also have created new avenues for malicious actors to commit crimes. This ranges from simple 'mischief' to significant crimes. Cyber security has never been more crucial as new cyber threats, ransomware, and phishing scams become more prevalent and sophisticated. The Nepalese government, financial institutions, academic institutions and private sectors have all identified the need for skilled graduates in the area of cyber security. In order to protect the information systems and communication technology infrastructure from various types of cyber-attacks and risks, Nepal Telecommunication Authority (NTA) has framed a Bylaw- "Cyber Security Bylaw, 2077 (2020)" and this has been implemented since 2020. As this Bylaw is based on international standards, there is a growing demand for skilled cyber security graduates in all the ISPs, network providers and Mobile service providers.

Courses like the BSc (Hons) Cyber Security and Digital Forensics, are directly focused at preparing students for a known skills gap in Nepal and, therefore, offer good employability options. In this context, The British College is launching a BSc (Hons) Cyber Security and Digital Forensics, franchised course of the University of The West of England, from January, 2022. The Programme delivers the in-depth knowledge and cutting edge skills required for cyber security and digital forensic related jobs in the current employment market.

The Launch Event- BSc (Hons) Cyber Security and Digital Forensic will be held on 2nd December, 2021 at Hotel Soaltee where Key people from relevant Ministry, Nepal Rastra Bank, commercial banks, internet Service providers, Nepal Police, Nepal Army, Nepal Telecom Authority, FinTech companies, cyber security experts, college principals, prospective students, and representatives from media are invited. The programme will be inaugurated by chief guest **Mr Bam Bahadur Mishra**, Deputy Governor of Nepal Rastra Bank (NRB) which will be followed by launching of the course, formal addresses, and the panel discussion with cyber security experts.

The panel discussion will cover the following:

1. Present context of Nepal- Cyber Security and Forensic Policy
2. Role of NRB in monetary regulations and Cyber Security (Threats and Shield Tools)
3. Perspective of Law in Nepal for Cyber Security and Forensics (Present and Amendments needed)
4. Growing Need for cyber security and Infrastructure development in the context of Nepal
5. Future Career Prospects in Nepal and Global Context
6. Contribution from Academia towards skilled workforce on Cyber Security and Digital Forensic.
